

I purchased XM radio in order to listen to commercial free music and for the news stations. The local radio in my area has 15 minutes of news in the morning. Seven minutes of which are commercials. I think that the local traffic and weather stations provide a great benefit for travelers since they do not have to be in the range of a local station and then have to wait until the weather and traffic are announced.

I request that you reject NAB's petition 04-160.
